

Our partners

IC in Pakistan collaborates with **partners** operating at various levels within Government including Federal, Provincial and district levels and with the leading research institutions. We enjoy partnership strength made up of private sector and within civil society networks (local, national) in the course of project implementation and in policy support. We are developing synergetic and strategic alliances with international NGOs and service providers in various facets of knowledge management to acquire comparative advantages in development. We encourage our partners to use relevant opportunities to ensure dissemination of key development issues identified and share solutions that have been proven to address such issues.
